FRAZIER RETURNS FROM INSPECTION

Salt Lake, Dec. 1.—Walter J. Frazier, city food and dairy commissioner, returned from Pleasant Grove last night, where he has been inspecting a number of dairies. He found that the sanitary conditions had greatly improved and that by the time the work is completed in remodeling the milk plants, Mr. Frazier says that they will all be above the standard. There was only one below the standard which Mr. Frazier scored.

When Mr. Frazier returned, he inspected the small dairy conducted by Mrs. Anna Berg, a widow, at Twelfth South and State streets, and stopped the sale of milk until her cows are tuberculin tested, and she places her dairy in a sanitary condition. Mrs. Berg is a widow and Mr. Frazier says that he has given her every opportunity to put her place in a sanitary condition.

Mr. Frazier is preparing to answer the Jensen Creamery company. The company has declared that it will have to raise the price of milk, if the city requires the creamery to keep its milk below 60 degrees temperature. Mr. Frazier is compiling the requirements of the milk ordinance in other cities, most of which require a lower temperature than Salt Lake.

STOCK RALLY ALL DOWN LINE.

New York, Dec. 1.—Prices of stocks had a substantial rally today. A general demand to cover outstanding shorts came from the bears and the withdrawals of selling pressure marked the subsidence of apprehension felt for several days over the anti-trust program at Washington. Another influence was the formal action by the House of Lords in London in appealing the budget decision to the electorate. The opinion holds that the steps made necessary in British fiscal affairs by this action as well as the unsettling influence on public sentiment of the grave governmental issues involved are destined to have a restraining effect on financial markets for some time.

The same mixed view may be said to hold on the larger question of corporation in this country. The demand for stocks, which was attributed principally to the uncovered shorts, was desiccated and showed some hesitation at the higher price levels. There was a resumption of leadership by some of the highly speculative issues and a renewal of dead rumors. These centered conspicuously about the dissolution of the Rock Island and Frisco Union and the possible alternative alliance that might be made.

The retention of the same dividend rate by New York Central and American Smelting disposed of rumors of an intended increase, but did not pre-

vent those stocks from advancing with the market. Chicago & Northwestern furnished another example of the recent tendency of stocks to decline when stock increases are proposed. Bonds were firm. Total sales, \$4,426,000.

U. S. bonds were unchanged on call. Prices of stocks started upward quite vigorously at the opening today, although the volume of trade was moderate. Reading rose 1 1/2; Utah Copper, Consolidated Gas, North American and Mercantile Marine preferred, 1 1/2; Union Pacific, Wabash preferred, American Car and Central Leather large fractions.

Some sympathetic reactions resulted in the selling of the Hill stocks, in which Great Northern "referred" to a point but the market afterward shook off this influence and advanced strongly. North American rose 2 1/4. Reading and Iron preferred 1 1/2. Amalgamated Copper and American Car 1 3/8. Rock Island, Wabash preferred, and International Harvester 1 1/4, and New York Central, St. Louis Southwestern preferred, Rock Island preferred, American Smelting and Iowa Central Leather 1. Northern Copper Fuel 1 1/2, and Union Pacific, Missouri Pacific, Louisville & Nashville, the U. S. Steel stocks, American Locomotive, Railway Steel Spring, Brooklyn Transit, Anaconda Northern 1.

Announcement of the right of stockholders to subscribe for new stocks at par to 25 per cent of their holdings was followed by a drop of 3/4 in the Chicago & Northwestern. "Uncle Sam" declining preferred lost 4 and Preferred Steel Car preferred 1. Prices reacted all around before noon.

COLUMBIA CON. FAILS TO RISE.

The mining stock market, with few exceptions, was a little weaker this morning. The exceptions were Grand Central, New York and Uncle Sam. The first named was strong around \$2.50, while New York sold up to 15 and Uncle Sam participated at 51.

Among the stocks which weakened were Iron Blossom, which receded to 69, Sioux Con., which moved down to 44, and Mason Valley, which fell to 790 at 1.90, the lowest price recorded for some time past.

Columbia Con. also showed some weakness in spite of the rumors that the shorts were going to be hard hit, through the stock owning beyond the two-dollar mark. Price Con. fell back to 1.10 and Seven Troughs was passed over the counter at 9 1/2. Ohio Copper also weakened at 5.20 on the open board.

The average man is so broad-minded that he finds it simply impossible to narrow his thoughts down to just one girl.

PEERS' VETO POWER NEEDS RESTRICTION

London, Dec. 1.—The National Liberal Federation tonight issued a manifesto to the country, which may be regarded as a party rally for the elections. It concentrates attention entirely on the constitutional struggle between the House of Lords and the House of Commons. It says:

"If the present action of the peers is not repudiated swiftly by the people, rights and privileges won so dearly by our forefathers in the great struggles for freedom are surrendered."

It declares the peers' power of veto must be restricted so that the last word on legislation and finance will rest with the House of Commons. Otherwise, no liberal ministry can again assume the responsibility of office.

"In the fight forced upon us," the manifesto continues, "the electors will have to decide whether they wish to govern themselves or be governed at second-hand by a few hundred hereditary peers who have the power to shift the burden of tax from the liquor trade and the foodstuffs to the foodstuffs and necessities of life."

Lord Roseberry reiterates that throughout he has opposed and warned against the course the lords have taken as one calculated injuriously to affect the house of lords itself and to enhance what popularity the budget may possess.

GIVES GOOD REPORT ON WESTERN UTAH.

Salt Lake, Dec. 1.—R. B. Bishop was in town today from the Western Utah Copper company's property in the vicinity of Deep Creek where he has been doing some contracting on the 600 level of that property.

The visit of Duncan McVie and Mr. Heinze to the property recently it has been decided to close down work temporarily. Mr. Bishop says the mine will prove to be a wonder if the immense body of copper on the 600 level goes down of which Mr. Bishop has not the least doubt. It is said to be all of 45 feet wide on the 300 level and everything indicates that the monster ore chute goes down to the depths. The company has not intercepted the ore body on the 600 level, the drift there being only about 150 at present, while according to Mr. Bishop, the management will have to run all of 45 feet further to get under the ore body on the 300. In Mr. Bishop's opinion the Western Utah will prove to be one of the big bonanzas in the West.

On the way to Salt Lake Mr. Bishop visited a prospect about one and a half miles across the flat from the Silver Island Coalfield Mines company, near Wendover. It is being worked by a Mr. Larsen of Sandy, who is said to have a fine streak of high grade ore about 18 inches thick, which will run \$50 per ton. The streak was found at the bottom of a thirty-foot shaft which Larsen is sinking only the fissure, which has a porphyry hanging wall and a lime foot wall.

LINOLEUM IN BLOCKS

Made in Large Pieces and Strips
Are Sliced Off Top.

A new method of manufacturing linoleum has been invented by a German, who thoughtfully patented his idea in this country, too. In describing this method we will consider the design of block, laid diagonally, as in the illustration. Long strips of linoleum, each consisting of the cross section of the tile, are cut into regular lengths and are assembled in a long square piece. Numerous pieces of the right of stockholders to subscribe for new stocks at par to 25 per cent of their holdings was followed by a drop of 3/4 in the Chicago & Northwestern. "Uncle Sam" declining preferred lost 4 and Preferred Steel Car preferred 1. Prices reacted all around before noon.

DESIGN THROUGH WHOLE BLOCK.

bers of these pieces are then placed side by side, with triangular pieces along the edges, and the whole compressed into a homogeneous block with the design running through the entire mass. This block is then cut from the top of the block at slices of a half of an inch, and after the sheets thus obtained have been given a suitable backing they are ready for use. Linoleum made in this way is said to be less likely to crack and break than that made under the old method.

DETROIT TEAM COMING HOME.

Havana, Dec. 1.—The Detroit American team has concluded its Cuban tour and is returning to the United States. Twelve games were played in Havana, of which the Americans won four last four each to the Havana Almendares teams. Detroit won the only game played in Matanzas.

THRIFT INCREASED BY POSTAL BANKS

Efforts to foster public thrift in the United States have caused the state board of trade of Massachusetts to join the powerful commercial organizations which, after investigations, have endorsed postal savings banks. The Postal Savings Bank league, with headquarters in Chicago, has been notified that this association some time ago appointed a committee on post-offices and postal laws, its chairman being Alfred W. Donovan of Rockland, a leading shoe manufacturer, who has also been one of the energetic pioneers in the movement for old age pensions and industrial life insurance.

Through the savings banks of Massachusetts. At the annual meeting of the board, Mr. Donovan's committee made a report, which was adopted, on postal savings banks as follows:

"Postal savings banks would foster thrift and increase the habit of saving in many states and localities where opportunities for depositing savings do not exist. They would be a real benefit not only for the people, but to the state and the nation. Practically all the leading nations of the earth have adopted this plan. Why should the United States, which has such a foremost position among the great nations lag on a question that would mean a great benefit to the general public? That there is no antagonism between the savings and insurance banks of Massachusetts and the proposed postal savings system in spite of the American Bankers' association's protest appears from the announcement in the opening address of the president of the board, Judge Lloyd E. Chamberlain of Brockton, Mass.: "A year ago I called your attention to the plan of savings banks and insurance companies then recently inaugurated in the Commonwealth, and suggested that its workings might well be watched with a view to urging its more general adoption as a possible solution, in part at least, of a problem very assuming larger proportions. I believe we can now with profit to the state, and in the interests of a large number of our people, take a more pronounced position."

WHY NOT STOP THAT ITCH?

10c Will Bring a Sample Direct From the D. D. D. Laboratories

Is it worth 10 cents to you to stop that itchy, awful agonizing itch?

If you are afflicted with skin disease, the kind that seems to baffle medical treatment, and leaves you will with itch, we hope you will not fail to investigate a prescription which is now recommended by many of the best skin specialists, even in preference to their own prescriptions. It is the simple, soothing oil of wintergreen compound known as D. D. D. Prescription and sells at \$1.00 a bottle. But a 10-cent sample bottle must convince you that this itch is instantly allayed by this prescription. Get a liberal sample bottle of the healing, soothing, external remedy, D. D. D. Prescription—and see!

We feel quite sure that before long you will be cured, and at any rate you know—KNOW—POSITIVELY—that your itch will be allayed instantly, the minute that soothing liquid is applied to the skin.

Write direct to D. D. D. Co., 112 Michigan St., Chicago, enclosing 10c for the sample bottle Colley Drug Co.

BIG SILVER VALUES IN PIOCHE X-RAY OUTPUT.

Ore assaying 1.015 ounces in silver, 54 per cent lead and \$5.10 gold, is what the Pioche X-Ray Mining company obtained from a sample taken from the new strike in the X-Ray property this week, says the Pioche Record. While this was a picked piece, Manager Taylor says that it is no trouble to get assays showing better than 600 ounces in silver.

The strike was made in a cross-cut from the bottom of the shaft—about 1100 feet from the portal of the tunnel—which was sunk about the time that Mr. Taylor began the development of the claims something like two years ago. The strike is in a bedded vein feet; but the high grade silver-lead ore comes from a streak from two to 10 inches wide. The balance of the vein carrying around 50 per cent lead, 30 ounces in silver, with gold associated.

The face of the tunnel is about 450 feet from where the bedded fissure should be cut, and at a point 470 feet vertical depth from the surface.

Truth can chase a lie all around the world and never catch up with it.

BALLINGER REFUSES PUBLIC STATEMENT

Washington, Dec. 1.—Secretary of the Interior and Mrs. Ballinger, returned here today. When asked if Attorney General Wickensham had made a report to the President concerning him in the controversy with Chief Forester Pinchot, Mr. Ballinger declined to discuss the subject.

"I do not know that such a report has been made," he said. "It would be impossible for me to discuss it. Anything that sort would have to come from the White House of course."

The white house had no statement to give out today.

WHY SO WEAK?

Kidney Troubles May Be Sapping Your Life Away—Ogden People Have Learned This Fact.

When a healthy man or woman begins to run down without apparent cause, becomes weak, languid, depressed, suffers back ache, headache, dizzy spells and urinary disorders, look to the kidneys for the cause of it all. Keep the kidneys well and they will keep you well. Doan's Kidney Pills cure sick kidneys and keep them well. Here is Ogden testimony to prove it.

Mrs. H. C. Peterson, 3434 Washington Ave., Ogden, Utah, says: "I was in a miserable condition as a result of kidney complaint, and although I consulted the best physicians in this vicinity I was unable to get relief. I suffered terribly from rheumatism and my feet were badly swollen as if I had dropsy. The backaches and pains in my joints were so acute that I could not rest at night. Doan's Kidney Pills, which I procured from Badcon's Pharmacy, gave almost instant relief, and as I continued their use, the symptoms of my trouble gradually disappeared. To say that I recovered is an understatement. I am now well and am able to express my high opinion of them." (Statement given in July, 1906.)

Mrs. Peterson was interviewed on July 20, 1906, and said: "My health has been unusually good since I took Doan's Kidney Pills. I have no objection to the continued publication of my former testimonial."

For sale by all dealers. Price 50 cents. Foster-McMillan Co., Buffalo, N. Y., sole agents for the United States. Remember the name—Doan's—and take no other.

Manzan, the great Pile remedy, prevents Piles by preventing constipation. It is conveniently applied directly to the trouble by means of a small nozzle attached to the tube by which Manzan is put up. Sold by Geo. F. Cave Drug Store.

SCIENCE NOTES

Some interesting statements relative to the decreased length of life of electric rails as compared with those on steam roads was brought to light at a recent meeting of railroad men held in Sheffield, England. Professor McWilliam, of the Bedford University, said, in reference to the corrugation of rails on electric roads, he considered it to be a mechanical effect of the mechanism running on the rails, and that it was not due to the fact that electric rails are heavier and do, he said, is to try to find something that will wear longer under the conditions of this service. Chief Engineer Wilcox, of the Metropolitan Railway, London, said that on steam roads, with the use of large wheels and springs, the life of rails may be 25 years or more. However, with a low center of gravity, small wheels, the ideal weights of motors and the extraordinary acceleration and deceleration, which are features of electric service, the life of rails comes nearer being 20 months. He had found that rails tested from steel, to which silicon additions had been made, had an increased life of about 110 per cent.

What are called continuation schools, are to be inaugurated in connection with the public school system of Cincinnati with the inauguration of the fall term. Apprentices and other employees of the shops will receive a regular course of training in educational matters along with shop training at their various places of employment, employers paying them for the time spent in class study the same as if they were at their tools or benches in the shops.

Two large electrically operated shovels are in use in some quarries near Chicago, which are interesting for the reason that they are the largest machines of their kind ever built and also that in their construction they are similar to steam machines built for the same work so that a fair comparison of costs can be made. They are 110-ton machines, with buckets of a capacity of four cubic yards. Compared with the steam shovel, the electrically driven excavating apparatus has been found to present marked advantages of economy and ease of operation.

The hauling of water and coal is avoided, fewer operators are required to handle the machine, and a considerable saving of time is effected. For example, the cost of operating a certain electric shovel with 75-horsepower hoist, 20-horsepower thrust and 20-horsepower swing boom is 1.14 cents per cubic yard of gravel, clay and sand, while similar work performed by steam shovels, it is claimed, would cost from 3 to 4 cents per cubic yard.

The new telephone system which is to be installed in the city of Feking by American firm, contemplates the erection of ten switchboards, one at either end of the city, to cost approximately \$100,000. The selection of American apparatus was made upon the recommendation of a commission which made a tour of the world and investigated the latest in use in all the large cities. The installation must be delivered early next year and the work will be done under American supervision and largely by American workmen and the plant will remain under American supervision until the Chinese operators have mastered the work.

JUDGE APPOINTS TUNNEL RECEIVERS

Chicago, Dec. 1.—Judge C. C. Kohl-saat, in the United States circuit court today appointed receivers for the Illinois Tunnel company and the Chicago Warehouse & Terminal company, companies held by the \$50,000,000 Chicago subway company.

David Forgan, president of the National City bank, and Charles G. Dawes, president of the Central Trust company of Illinois, were named as receivers for the Tunnel company, and Edwin A. Potter, president of the American Trust & Savings bank, for the other.

The companies went into receivership after two judgments had been rendered against them in favor of Corporation Trust company. The judgment against the warehouse company was for \$3,046,794, and that against the tunnel company \$1,129,428.

Reorganization was made necessary because the bond limit for the tunnel company had been reached.

GERMANY NOW FACES HOT PARTY STRUGGLE.

Berlin, Dec. 1.—The first business session of the Reichstag gave striking evidence of the tension between the political parties as a result of a quarrel over the reform of the empire's finances. After the house had re-elected Count Von Stober-Wernigerode, president; Dr. Spahn, clerical, as first vice president, displacing Dr. Hermann Aache, national liberal, it elected Paasche second vice president. The latter, however, declined to serve.

The National Liberal party had decided unanimously not to accept office in the re-organization. The imperial party, or Free Conservatives, also declined to take part in the organization, while the Radicals went so far as to decide that they were to cast blank votes. These three parties are determined to place the responsibility for the coming legislation upon the German conservatives and clericals.

WEEDING OUT OF RECKLESS AND INCOMPETENT CHAUFFEURS

New York, Dec. 1.—The weeding out of reckless and incompetent chauffeurs through a new license law is advocated by Samuel I. Koenig, secretary of state of New York, in a statement submitted to the public today.

"There should be rigid examination and supervision of all applicants for chauffeurs' licenses," says Mr. Koenig. "I suggest the creation of a state commission with branches in cities throughout the state, which will examine all would-be chauffeurs as to their fitness. Under the present law any man who signs the application and pays the fee is granted a license. This must be changed and a new law passed which will safeguard the public."

VALUES IN EAST FISSURE.

Salt Lake, Dec. 1.—Some encouragement is felt at the office of the Lower Mammoth Mining company because of a report from Superintendent Coffin that quartz containing 2 per cent copper with 17 ounces silver and some gold, has been encountered in the bottom of the drift in the east fissure on the 1,500 level. The main work of the mine at present is being directed to getting the station completed on the 2,000 level. As soon as this work is done, it will allow of more exploratory work being done elsewhere in the mine.

The Little Buck has been kept busy lately hauling the dirt from the bottom of the shaft, as high as 140 carloads per day being brought to the surface.

LITTLE BUCK SHIPS ORE SHOWING FREE GOLD.

Fay, Lincoln county, Nev. Dec. 1.—The Little Buck mine, near Fay, has begun shipments of ore to the Horseshoe mill at Fay, which is about ready to begin treating custom ore. The Little Buck has been leased for a year to John Bryden, and efforts are being made to produce a steady tonnage. There is a good streak of ore showing some free gold in the south drift on the 100-foot level.

The old Horseshoe shaft is being repaired, as it had given way in several places above the 100-foot level. It is now in good shape to that point and explorations will be begun with a view to taking out ore as soon as possible.

AVOID THE KNIFE

CUTTING WON'T CURE PILES—INTERNAL TREATMENT NEEDED

A gardener doesn't kill weeds by cutting their tops. He attacks the root. Just so with piles—the cause is within, entirely out of reach of surgical instruments, ointments or suppositories. The only cure for piles is internal, and the only guaranteed internal remedy is Dr. Leonard's Hem-Roid. It has cured 98 per cent of cases, and 24 days' treatment is sold for \$1 at Badcon's Pharmacy, Ogden, Utah, under positive guarantee. Or mailed by Dr. Leonard Co., Station B, Buffalo, N. Y.
